Cen. Dockery against Gen. Jackson.

During the session of the Legislature of North Carolina in 1842-'43, Mr. Jones of Orange introduced into the House of Commons Resolutions in relation to instructions to Senators, in relation to the Tariff, disapproving the Bankrupt Law, declaring that the fine imposed on Gen. Jackson by Judge Hall ought to be refounded, in favor of the veto power, &c. These Resolutions, after being slightly amended and desper. ately opposed by the federal members, passed the Commons, and were sent to the Senate. The following are the Resolutions :

1. Resolved, That the Legislature of this State have a of the Senators to obey the instructions given, or to resign their seats: Provided, the instructions to be given and obeyed, require not the Senator to commit a violation of the Constitution, or an act of moral turpitude.

2. Resolved, 1 hat while North Carolina, in the opinion of this Legislature, will never object to any amount apportioned and imposed, for the purpose of raising revenue to support the Government, economically administered, yet this State will never consent to the imposition of taxes, the design and operation of which are to promote the interests of particular occupations, at the general expense.

Various efforts were made in the Senate to amend these Resolutions and thus indirectly defeat them; and upon every motion to amend them and embarrass their passage, Gen. Dockery voted in the affirmative. He also voted, with thirteen other federalists, to lay them on the table. At length the vote was taken on the Resolutions separately, all motions to amend having failed. Gen. Dockery voted against the first in Secretary Marcy and Mons. He therefore took the ground, in voting against the sixth Resolution, that the Tory Judge who fined Gen. Jackson was right, and that Gen. Jackson was wrong;

> From the National Intelligencer The Killer Whale.

Washington, April 27th.-Messrs. Editors:-In Lieut. Maury's description of the whale, he made some remarks on a fish of the above species called the killer. This fish is described in " Porter's Journal of known to the scientific. Having on more than one occasion been an eye-witness of the attacks of this fish on the whale, I will attempt a description of it.

The killer is the wolf of the ocean, and hunts in packs, and their tall dorsal fin can be constantly seen above the water. This fish has always as a companion, but swimming deeper, the sword-fish, and now and then can be seen the shark. On sighting their prey, which the killer sees at a great distance, at from 3,000 to 5,000 men, was encamped in the the pack gives chase; the unconscious whale is sloww moving near the surface, and occasionally spouting, as it were in sport, jets of water above him .-But he now suddenly sees the "sea-wolf" near him. Instinct at once teaches him that on the surface he cannot be safe, and, taking in a long breath, he flukes, that is, dives.

But there has been another enemy watching him from the depths below, the "sword-fish," which now ars. This sends him at once to the surface; here he semi-annually; and the bonds will be endorsed by again meets with his enemy, the "killer:" but as yet they are afraid to approach him. The whale now begins to see the extent of his danger, and for a time merely lashes the water with his ponderous fluke. He soon tires of this, and remains for a short time at rest; the pack now approach him, and he seeks safety in the investment would be entirely safe. Its advantage flight. But what can he do? The poor whale has a hump on his back and steers unsteadily, while the killer's tall and stiff fin steadies him on his course. Nearer and nearer approaches the pack to their victim; again he takes a long breath and dives. The sword-fish has steadily kept him in view; he too has a tall fin and long slender propelling tail; and while it is an effort to the whale to increase his speed, it is but play to the swordfish, which again darts and perforates his prey, and sends the wounded whale again to the surface .-The race again commences, but this time with diminished speed, the killers having separated to watch this city, on Sunday evening's train, en route to the rise of the whale, who, finding his enemies in every direction, courses in a circle, and again makes a third, and sometimes a fourth attempt to escape by him, upon a short notice, collected a very respectable diving, but is always met by the terrible spike of the audience, who were addressed by Mr. Bragg for some sword-fish. He at last, weak, exhausted, and dispirited, returns to the surface, where he again attempts escape by flight.

Streams of blood mark his course; his enemies still follow steadily after him, until he stops and begins to lash and make the ocean foam around him; out now large streams of his life-blood are pouring out, and he is only increasing his weakness by the exertion, and merely lashing amidst his own gore.-Tired, exhausted, and faint, he rolls over. The deep streaks of blood flowing from large orifices in his white belly can now be distinctly seen. The hungry pack now close, and one more bold than the rest seizes him near the throat and tears away the skin This is generally the signal for a combined attack. His tongue is seized and torn from his mouth; so are his eyes. The sword-fish now rises to the surface, and his tall spar-like protuberance is seen projecting over the body of the whale; the sharks also. close in and feed on the fat rejected by the killers.

selves, or are offlicted with any incurable disease. MESSRS. EDITORS :- We shall now endeavor to show the insufficiency of the provision of the Govern ment for " sick and disabled Seamen," even where a Hospital is established, and our need especially of aid to establish such institutions as are adequate to the wants of Seamen. To do this we would call attention to the various classes of Seamen excluded ulations" of the Government, the inadequacy of the relief extended to the seamen of our Port especially, and the objects and claims of the Seamen's Friend Society of Wilmington. And 1. The various class. es of Seamen not entitled to Hospital relief. These were 114 arrivals and clearances of foreign vessels, with 932 men, at the port of Wilmington for the and destitute, cannot be admitted into a Hospital unless their expenses are paid, and it is convenient. It of these men are discharged, or harbored until their vessels leave port. Yet, if sick and destitute, they dom or for Cossack power. should be provided for. But we have no institution save the "Home" to take care of these men.

should be remembered that a large portion of our Sailors are foreigners, that almost every voyage finds therefore though they may have sailed for years in American vessels it rarely occurs that they can establish the fact, or show sufficient service to claim hospital relief. And the injustice of this regulation farther appears from the boast of Americans as to the guaranty of citizenship afforded by the American flag. and that a hospital tax is exacted of all foreign sailors under that flag, and yet in order to secure the benefit of that tax they are required to prove what the Treasury Department must know it is almost impossible for them to prove.

3. American seamen who are without a protection Government.

4. American Seamen whose diseases are produced by their vices. These are excluded, although they are not exempted from the hospital tax, and therefore fund. And this is done though their diseases often result from associations into which they are forced "economy of expenditure" in regard to sick and destitute seamen as frequently to afford them only such accommodations as are in the "house that is the way to hell, going down to the chambers of death." The Sailor Prodigal, however, who has "wasted his substance with harlots" need never look for the outsuch "compassion on him" as to consign him to their "tender mercies" and though helpless, penniless and

5. American Seamen afflicted with mania or any incurable disease. These cannot enter the Hospital "for any period, however short." pauper. For, "in all cases" say the Regulations of the Treasury Department "the relief afforded shall be confined to seamen in destitute circumstances." And this, too, when the fund was accumulated, not to be distributed to paupers, but for the "maintenance and relief of sick and disabled," not destitute seamen.

Such is the inadequate provision for seamen gen erally, even where there is a U.S. Marine Hospital, but a much more limited relief has been extended to the seamen of our Port. And this will be shown from the pittance heretofore received from the Government, the unjust discrimination made where there is no Hospital, and the continued restrictions of Secretaries of the Treasury on disbursements for the relief of the seamen of the Port of Wilmington.

SLAVERY EXISTING IN NEBRASKA.—A letter from William Walker, Chief of the Wyandott tribe of Indians, formerly of Ohio, but now located on the Indian territory, at the junction of the Missouri and Kansas rivers, was published in the Cleveland daily Herald, of Tuesday. It was originally addressed to S. Blocker, Esq., of Wadsworth, Ohio. He gives the following statement in reference to the existence of slavery in the territory of Nebraska, which will be read with much interest :

There is one fact relating to slavery in this territory of which you are perhaps not aware, as I perceive it is not generally known in the East, viz: the existence of slavery here among the Indians and whites, in defiance of the compromise of 1820. It has been in existence ever since it was organized as an Indian Territory. True, there are not many slaves, but still slavery exists. Some slaves are held by the Indians by virtue of their own laws and usages, and some by regular bills of sale from citizens of Missouri .-White people going into the territory by the authority Of the insane here enumerated, 14,972 were white, of the government, in the character of Indian agents, and 638 colored; of the idiotic, 14,257 were white, mechanics, licensed traders, teachers, missionaries, and 1,530 colored. VISIT HARRISON'S VS. WHITEHURST'S

WILMINGTON GALLERY. WHAT treasures of art does this little room contain ?-Whichever way you turn, some immortal creation greet your eye. Here you can linger profitably for hours contemplating the noblest of God's creation—man; here converse silently with the living and the dead, until the withered arm of memory seems again restored and strength ened, and reaches forth its hand to greet those with whom we were once intimately associated, but now inhabit the gloomy prison house of forgetfulness. Who would die with out leaving so desirable a token of remembrance behind? auty, with its diversity of expression and features, glows forth from the plate with rapturous divinity, and fas-cinates the eye, until the heart worships them, not like the inimitable virginly Angels, the sainted Madonna, or the blue-bearded Magdalene, but as the unapproachable Daguer-reotypes of relatives and friends, made by Harrison.

We are happy to see that there is still some power in the State willing to oppose the barriers of the constitution to the omnipotence of Congress. It is for them to appreciate such privileges, not for the United States to bribe them to come and accept of them. About eight years since Mr. Slocumb entered the legal profession in his native county, to the study of which he devoted himself with the utmost zeal and assiduity, and it is probable that his laborious studies may have aggravated, if they did not produce the fatal disease that terminated his life. Although Mr. Slocumb leaves no wife or children, there are yet many to mourn his loss; devoted brothers and sisters, attached friends and trusting clients. In death, he was cheered by the blessed consolation of religion, and his pillow smoothed by the kindness of affectionate relatives. The funeral discourse was preached by the Rev. C. C.

In the death of Mr. Slocumb his native county loses a valnable citizen, and a man estimable and praiseworthy in all the relations in which he was called upon to act.
